Welcome To Target Archery in South Africa

A New Experience

Welcome to the sport of target archery in South Africa. Men, women and juniors from all sections of the community are encouraged to participate at all levels in the sport: Shooting, administration, coaching, judging, competition and representing South Africa at International events such as the Olympic games and world championships.

An Ancient Art

The sport of archery was introduced to South Africa centuries ago, and formalised in the 1950's with the formation of the national association of archery. Since then, the South African National Archery Association (SANAA) has held over 50 national championships and participated in numerous international events.

A Noble Sport

SANAA is affiliated to a number of sporting bodies, including the international governing body FITA, the National Olympic Committee of South Africa, The Council of Archery Sport and the National Sports Council.

A Represented Sport

The SANAA committee consists of Executive members and Representatives from the Provincial bodies and encourages you to join the association. All you have to do is complete the membership application for on the reverse and hand it into your club or provincial secretary. If you don't yet belong to a club, send the form to the SANAA treasurer. SANAA will then provide you a list of local clubs, where you can experience the sport.

Archery Needs You

Being a member of a professional body offers a number of advantages. The most important being that you contribute towards the growth of the sport. You also receive many benefits, such as being part of a body which is recognized both locally and internationally.

Keeping in Touch

Our monthly newsletter, The SA Archer, is provided to you on a monthly basis where you can read about clubs in your area, news from around the country, competition and tournament results and reminders about important archery events in all the provinces. All members are invited to participate in both indoor and outdoor events.

The Right Route

As a member of SANAA you have access to our guides on buying the right equipment and availability of both national and international publications on training, coaching and improving your game.

International Recognition

It is only by being a member of SANAA that you can participate in international target competitions, whether they be indoor or outdoor. But we take it one step further by giving you the chance to achieve international recognition to win international awards locally.

High Standards

South Africa offers some of the most respected international archery judges in the world, as well as international level coaches. The benefits and resources of these skills are available to all SANAA members.

Join Today

To create awareness amongst more people, SANAA offers every archer the opportunity to improve their archery. It offers a formalized coaching programme available from archery clubs, covering a wide variety of disciplines and equipment styles. Age is no criteria, which is why archery is the sport for all.
